Thumbnails icon invisible

Posted by havemaskwilltravel - 2020/06/26 16:01

_____

Very happy with the plugin, except after having installed the paid version, the thumbnails icon is not shown anymore even though Iâ€™ve selected it under tab Lightbox > Buttons. In the source code I've noticed this line:

Iâ€™ve tried adding the following code to tab Advanced > Custom JS code:
jQuery.fancybox.defaults.onActivate = function() { jQuery.fancybox.getInstance().Thumbs.show(); }

That does display the thumbnails in the sidebar, but they stay visible then as the thumbnails toggle icon doesnâ€™t work. I've also tried deactivating all plugins. Do you have any suggestions?

Ps. the free version DOES show the thumbnails icon but I prefer to use the paid version because of extended functionalities.

Example: https://extra-makelaars.nl/woning/enter-van-uitertstraat-30/

_____

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

$('.slick-slide').each(function() { var $this = $(this); $this.attr('data-options', JSON.stringify({thumb: $this.attr('href')})); });

Regards,
ARI Soft

_____

I've followed your instructions, but the thumbs icon is still not visible unfortunately.
Are you sure the code you suggested is correct?

_____

Try the following code instead of the previous one:

setTimeout(function() { $('.slick-slide').each(function() { var $this = $(this); $this.attr('data-options', JSON.stringify({thumb: $this.attr('href')})); }); }, 100);

Regards,
ARI Soft

_____

I have an additional question.

On https://extramakelaars.nl/woning/enschede-wieringermeerstraat-8/ there's a blue box called 'Downloads' that contains links to 3 types of media:

1) PDF brochure
2) plattegronden (images)
3) video

Link 1 and 2 are using ARI lightbox and the 1st link works properly. When you click on 'plattegronden' (2nd link), the counter says there are 5 items to be displayed. Items 1, 2, 3 and 4 are all images, but item 5 can't be shown (the URL is missing) because it's a PDF. Is it possible to automatically detect if a media file is a PDF and if it is, show it properly?

_____

Hello,

The 5th item is just a text. We don't see any link to PDF file in page HTML code:

 http://www.ari-soft.com/images/fbfiles/images/source.png

_____

Is there a way to hide or omit items that don't have a URL (the HREF is undefined) so there won't be an empty item displayed in the popup?

_____

Add "no-lightbox" CSS class to links which should be ignored. It will look like:

some content

_____

Hi! I have just installed the pro plugin. I have the same issue. Unfortunately the code does not work for me. '.fancybox-button--thumbs' comes out 'display: none', and even if it is changed to 'inline-block' by css, nothing happens when clicking on it. The non-pro version of the plugin did not have this issue. Any ideas on how to sort this out?

_____

Hello,

Is it possible to see the problem anywhere?

Regards,
ARI Soft

_____

Hi, unfortunately I am working on localhost. There are no errors in the console either... I am attaching a screenshot of the elements / page ...

_____

We can't investigate this problem by a screenshot. It can be a conflict with 3rd party plugin/theme. Could you reproduce the problem on a public site so we can investigate it?

_____

I managed to sort it out! I had a "show more" button with text - it seems all items need to be images - I did remove all plugins and moved to WP native themes and it didn't sort it out, so I figured out I must have been doing something wrong!! Sorry for bothering you! Have a great day!!

_____

Last year I wasn't able to see the thumbnails icon and you then suggested I use the following code:

setTimeout(function() { $('.slick-slide').each(function() { var $this = $(this); $this.attr('data-options', JSON.stringify({thumb: $this.attr('href')})); }); }, 100);

That worked like a charm, up until very recently. The thumbnails icon is no longer visible, see for example: https://extramakelaars.nl/woning/enschede-holzik-es-1/ (click on the large real estate visual containing the magnifying glass)

The source code shows the following:

Do you perhaps have an updated solution to the problem of the missing thumbnails icon?

_____

Hello,

Try the following code:

$('a.kb-bg-slide-contain').each(function() { var $this = $(this); $this.attr('data-options', JSON.stringify({thumb: $this.attr('href')})); });

Regards,
ARI Soft
