
link to url with .jpg does not load

Posted by antoni2710 - 2020/09/17 14:06

Dears,
when I add a link to an url with an .jpg ending below an image, it works.

When I add this link in a text, it does not. It shows "The requested content cannot be loaded. Please try again later.".

Here is an example: <https://meinwarschau.com/warschauer-aufstand-1944/> | the link is at the bottom of the post:
Beitragsbild: Adrian Grycuk via wikimedia | CC BY-SA 3.0

Thank you for some advise how to manage this.

Best wishes
Antoni

Hello,

The problem occurs because the link to a web page is used instead of link to an image. You can see it if open the link into a browser. If you really want to show this webpage then add class="ari-fancybox-iframe" attribute to tag:

Adrian Grycuk via wikimedia | CC BY-SA 3.0

or use the direct link to the image:

Adrian Grycuk via wikimedia | CC BY-SA 3.0

Regards,
ARI Soft
