
no-lightbox

Posted by GroenHart - 2020/09/23 11:39

I am using the PRO version of ARI Fancy Lightbox.

I am very satisfied about it, but I wonder if someone can help me with a little problem

My theme: Generate Press

All the menu-options are opening in same the window. All hyperlinks from my domain are opening in the lightbox. Perfect! But...

I want one of the menu-options not opening in the lightbox but in a new window.

Selecting in the menu-setup 'opening in a new window' and adding the css class 'no-lightbox' is not working the way I want.

The source-code of this menu-item is:

Agenda

Can someone assist me in solving the problem?

Hello,

Add no-lightbox CSS class to element instead of

- . It will look like:

Agenda

Regards,

ARI Soft
