
Multiple choice error

Posted by kmelvin85 - 2020/10/05 22:44

Hi, when I add a question which has 2 correct answers, on the front end for the user - they can select more than 2 answers (in fact it lets them select all the answers). Is it possible to limit the number of answers the user can select when there is 2 correct answers?

=====

Hello,

The plugin doesn't support this ability. It supports single question type (when only one answer can be selected) or multiple question type (when any number of answers can be selected).

Regards,
ARI Soft
