
How to hide image description text

Posted by breezuck - 2020/10/30 14:07

Hello,

I'm using this plugin with NextGen gallery, and I've added paragraph-long descriptions with each image in the gallery. These appear beneath each image in the gallery, which is what I want, but I do not want the image descriptions to appear in the lightbox. However, I don't see a setting that will allow me to hide the description in the lightbox view.

I've attached an image showing the text that I don't want.

Thanks! <http://www.ari-soft.com/images/fbfiles/images/ImageDescription.png>

Hello,

Could you provide a link to a page this the gallery?

Regards,
ARI Soft
