Hello, I am hoping someone can help. I am using Kinetika theme and have disabled the default lightbox. I have ARI Pro installed, but the image only opens in the lightbox. There are no arrows or thumbnails of the other portfolio images. I am not sure what other info I can provide to help you help me. My website is my user name at dot com. Thanks so much.

Hello,

Populate "ARI Fancy Lightbox -> Settings -> Integration -> Images -> Custom grouping selectors" parameter with the following value:

.owl-carousel$$.owl-item A

Thank you so very much. That got me much closer. Interestingly, that only works with one portfolio type. I found the ".owl-carousel$$A" grouping_selector in the script code. I don't see any other selector, so I'm unsure why it is only working with one portfolio type, versus the others. It gives me arrows (no thumbnails). Any clue where else I can look for the selector, if that is the only thing I'm looking for?

Thanks, again.

Could you provide a link to a portfolio page where navigation is not working? Selectors are based on HTML layout of a

gallery.

Add also the following code to "Custom grouping selectors" parameter on a new line:

.mtheme_portfolio$$A
