
Comments System

Posted by Paul Podesta - 2021/03/24 08:31

Is it possible to use either (a) the Wordpress native comments system in the lightbox or (b) a third party comment system like Disqus?

Using the Facebook comments system does not save the comments in the Wordpress database which is something I'd prefer for flexibility.

Hello,

Sorry, but currently only Facebook comments are supported.

Regards,
ARI Soft

I too am very interested in WordPress native comments as a substitution for Facebook comments. Many of my friends do not use Facebook but do use on-site comments. It would make the premium version far more appealing compared to other FancyBox plugins available. B)
