Conflict with prettyPhoto

Posted by Anna_maharathi - 2021/04/01 10:15

_____

Hello.
I just installed the pro version of the ARI Fancy Lightbox plugin on my site for testing.
I notice that the plugin creates a conflict of display of existing images with opening option in prettyPhoto.
The window opens in duplicate, first with ARI Fancy Box, then once Fancy box is closed in prettyPhoto.
My costumer's site has a lot of images that are already integrated and use the "open in prettyPhoto" option.
Is this normal? Is there a way to fix this.
Thank you in advance.
Anna

_____

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
$(window).load(function() {
    $('a.ari-fancybox').off('click.prettyphoto');
});
```

Regards,
ARI Soft
