
Navigation between items not working

Posted by paul_wid - 2021/04/15 09:51

Hi, I tried all possibilities, but I am not able to activate on my Project the Navigatin between items. The Arrows are not showing up and the keys are not working.
Can you help me out?

Hello,

The plugin can't group items automatically based on HTML code which is generated by your visual builder. Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
setTimeout(function() {  
    $('.avia_textblock').each(function(i) { $(''.ari-fancybox', this).each(function() { $(this).attr('data-fancybox', 'group_' + i); });  
});  
});
```

Regards,
ARI Soft

Wooooow!

Thats Support! Thank you verry much. It works. I tried 3 hours and was not successfull!

Sincerely
Rafael
