
Hosted video autoplay

Posted by Anna_maharathi - 2021/04/17 14:40

Hello.

I use the ARI Fancy Lightbox plugin to read the videos hosted on the site.

I would like to know how I can integrate the video autoplay at lightbox opening moment.

<http://www.maharathi.net/index.php/interventions/>

Thank you very much for clarifying.

Best regards

Anna

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
$(document).on('afterShow.fb', function(e, instance, current) {  
  if (!current || current.type !== 'video') return ;  
  
  current.$slide.find('video:first').trigger('play');  
});
```

Regards,
ARI Soft
