
Ignore links with sameorigin/deny headers

Posted by thehealthexaminer - 2021/04/20 19:01

I've seen threads that suggest the following code for manually excluding domains

```
var ignoreSites = ;
```

```
$('a').each(function() {  
var $a = $(this), domain = ARI_FANCYBOX_HELPER.getLinkPart($a.attr('href')).replace(/^www./i, '');  
if (ignoreSites.indexOf(domain) !== -1) {  
$a.addClass('no-lightbox');  
}  
});
```

is there a way to dynamically check if a domain is protected against iframe and ignore them?

Hello,

It requires to send a request to a domain to check CORS policy. The plugin doesn't support this ability.
