
Show a icon with a magnifier ...

Posted by voker01 - 2021/07/02 15:02

Hello,
is it possible to show a icon over the pictures,
so users can realize that is a picture with zoom?

Especially on mobile devices with no hover, this would great.

Greetings.

Hello,

You can add the following CSS rule to "Custom CSS" parameter on "ARI Fancy Lightbox -> Settings -> Style" page:

```
.ari-fancybox::before {  
    content: ' ';  
    position: absolute;  
    width: 20px;  
    height: 20px;  
    top: 50%;  
    left: 50%;  
    margin-left: -10px;  
    margin-top: -10px;  
    display: block;  
    background: transparent no-repeat url(https://img.icons8.com/material-rounded/24/000000/search.png);  
}
```

just replace zoom icon with an appropriate one.

Regards,
ARI Soft
