
Unable to Navigate Between Images

Posted by mryczek - 2021/07/29 15:53

https://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2021_07_29_at_11.png Hello,

I am unable to navigate between images on a page. The images are featured image post thumbnails on a custom archive page and when I click on a thumbnail, it only opens that image in the lightbox - no arrows. I am developing the site locally so do not have a public url. I am able to send a temporary "live link" with Local by Flywheel but for some reason the styles are currently missing - except, when clicking on an image, the lightbox still works. Not sure if you are still able to view the code and see what's wrong. Otherwise, this plugin is excellent and exactly what I need. Looking forward to your response!

Open Live Link: <https://grey-test.localsite.io>

If prompted, enter the information below.

Username: scissors

Password: electric

(Please navigate to "Work" > "Latest" for example)

Hello again,

I actually just figured it out - it was as simple as adding a class to the thumbnail in my custom archive and using it as a selector in the admin. Thank you again for this awesome plugin!!
