ARI Fancy Lightbox doubles first picture

_____

Hi,

I've installed the plugin, it works fine but I have a few questions

- for some reason the plugin doubles the first product image. So when I click on 'next image" the first image of the product is showing again. This only happens with first the product image, after the first picture the other pictures are showing correctly. Check: https://mrental.nl/product/6x-accu-led-grondspot-eventspot-1600-q4-ip54/ How can I fix this?

- Is there a way to get the 'close button' bigger? It's really tiny in the upper right corner

- On a mobile device clicking next to the image to return to the website is not working, you must swipe up or click on that really small close button in the upper right corner. On a computer this works fine.

I hope you can help!

Thanks

Hello,

The problem occurs because the image are defined twice in page markup. Populate "ARI Fancy Lightbox -> Settings -> Advanced -> Custom JS code" parameter with the following code to fix this issue:

```
setTimeout(() => {
var images = $('.image_wrapper A.woocommerce-main-image'); for (var i = 0; i < images.length - 1; i++) { var
currentImage = $(images); if (currentImage.hasClass('no-lightbox')) continue; var href = currentImage.attr('href'); for (var j
= i + 1; j < images.length - 1; j++) { var siblingImage = $(images); if (siblingImage.attr('href') === href) {
siblingImage.addClass('no-lightbox').removeClass('ari-fancybox'); siblingImage.removeAttr('data-fancybox'); } } }
});
```

Close button is small due to custom WooCommerce styles. It uses !important (usually it is a bad practice) and this affects on close button styles. Add the following CSS rule to "ARI Fancy Lightbox -> Settings -> Style -> Custom CSS" parameter to fix this problem:

.woocommerce button.fancybox-button--close {padding: 10px !important}

Regards,
ARI Soft
