# Titel and Caption

Posted by Meggsico - 2021/09/14 19:34

_____

Hello Support

I purchased the plugin and i'm very satisfied with it.
I'm using it together with the plugin justified image gallery (JIG) and it works perfect.

One little point i would like to change. Is it possible to show the title and caption in the lightbox.

like this
Titel -> 1. line
Caption -> 2. line

Below you see the html-code which is generated from JIG.

class="justified-image-grid-html" data-lazy-src="skiplazyload" data-src="skipunveillazyload">
 - Walenpfad Engelberg - Ristis - Brunnihütte - Walenalp - Walegg - Chrüxhütte - Fell<

from jig-HTMLdescription:
Title -> Walenpfad
Caption -> Engelberg - Ristis - Brunnihütte - Walenalp - Walegg - Chrüxhütte - Fell

thx for your help

cheers
Meggs

_____

Hello,

Could you provide a link to a sample page?

Regards,
ARI Soft

_____

Hello Support

Unfortunately, this is not possible because this site has access protection from outside.
What do you need? Above you see the html-code for one photo, which is generated from the plugin jig

Cheers,
Meggs

_____

Try to populate "Custom JS code" parameter on "ARI Fancy Lightbox -> Settings -> Advanced" page with the following

code:

```
$('.justified-image-grid-html li').each(function() {
    var $item = $(this), $a = $item.find('a'), $descr = $item.find('.jig-HTMLdescription');
    var descr = ($descr.html() || '').split(//);
    var title = descr, story = descr;

    if (title) {
        $a.data('title', title);

        if (story) {
            $a.data('description', story);
        }
    }
});
```

If it doesn't help, could you reproduce a sample gallery on a public test site so we can help you?

Regards,
ARI Soft

_____

thank you for your answer. But it doesn't work.

if I use not your code and disable all options (smart titel, Convert file name to title, Get title from EXIF data) the content of the WP-image field "description" is displayed.
In our example -> "Engelberg - Ristis - Brunnihütte - Walenalp - Walegg - Chrüxhütte - Fell" but "Walenpfad " is not displayed. Walenpfad  is the content of the WP-image field "title".

If you can only display the content of  or you could cut  from the code fragment below we would have reached our target.
Walenpfad Engelberg - Ristis - Brunnihütte - Walenalp - Walegg - Chrüxhütte - Fell<

But i think the better way is we put title and description with variables from the code together.

alt="Walenpfad  -> WP-image field "title"
title="Engelberg - Ristis - Brunnihütte - Walenalp - Walegg - Chrüxhütte - Fell"> -> WP-image field "desciption"

Cheers
Meggs

_____

something else. with the following code from your forum only "Walenpfad " is displayd in the lightbox

setTimeout(function() { $('.ari-fancybox>IMG').each(function() { var $img = $(this), $a = $img.parent(), alt = $img.attr('alt'); if (alt) $a.data('caption', alt); });});

Maybe it helps you

_____

Probably you can reproduce it on a public server so we can play with live example?

Regards,
ARI Soft
