Plugin working great apart from the navigation. I think I need to configure the plugin to group the items in the gallery but I can't figure out how to do it. Any help is appreciated!

Hope to get this working on each of these pages (and more in the future)

Thanks

Hello,

Open "ARI Fancy Lightbox -> Settings -> Integration" page and populate "Images -> Custom grouping selectors" parameter with the following value:

.tiled-gallery\_\_gallery\$\$A
