
File orgin does not match viewer's

Posted by shall - 2021/10/21 20:12

Hello I am trying to use ARI Fancy Lightbox to view a pdf. Sometimes I get the following error depending on which browser I use to try and preview a pdf:

PDF.js v2.4.456 (build: 228a591c)

Message: file orgin does not match viewer's

Any ideas?

=====

Hello,

Make sure you don't mix http and https in file and page URL. If it doesn't help, could you provide a link to a page where the problem occurs?

Regards,
ARI Soft
