
updating to 1.8.9

Posted by ikester7579 - 2021/11/07 03:03

It won't update any newer than 1.8.7. I have deleted it and installed the newest files on CodeCanyon. My support is up to date. I paid last time would not update then either. So are the files on CodeCanyon up to date? Do I need to go somewhere else to get the new file. Or do you need to send me a link? Frustrated. I really like the plugin. But if I cannot update it, what's the point of paying for support?

Hello,

v. 1.8.9 is in review on CodeCanyon. If you want to receive updates from our site, contact us by email.

Regards,
ARI Soft

I did but no one responded. And how long does a review take? I have paid for support more than once hoping to get an update but nothing. Even though some of the features do not work at all on my site, I still like the plugin for what it will do aka play videos in a popup from an image without leaving my website.

1.8.9 should be available on CodeCanyon. Plugins which are purchased via CodeCanyon can be updated via this plugin.

If you want to receive new version from our site, contact us by email and we will provide API key.

Regards,
ARI Soft
