Is there an alternative to file names as captions?
Posted by roddyhunter - 2021/12/29 15:24

_____

Hi

Love the Fancy Lightbox plugin, thanks! Only problem is that captions seem to automatically show the filename when I'd prefer to create a title for each image. Any tips?

Thanks!

_____

Hello,

If you show images from WordPress gallery then titles can be defined in gallery.

It is also possible to disable conversation files names to titles. For this open "ARI Fancy Lightbox -> Settings -> Intergration" page and uncheck "Images -> Convert file name to title" checkbox.

Regards,
ARI Soft
