
Insert Custom Field Where Caption Is

Posted by freedomarisoft - 2022/02/14 00:15

Hello,

Is it possible with Custom JS Code to insert the value of a custom field where the caption is currently outputted?

If it is possible, but a custom thingy that requires time and is outside the scope of the current plugin development, then I would have an interest in fund\$ng the development of that, to a certain degree.

Cheers

Hello,

Could you specify what custom field do you mean? Is it an HTML attribute or field which are stored in a database?

Regards,
ARI Soft

A custom field from a wordpress post/database. I attached an image to clarify things. https://www.ari-soft.com/images/fbfiles/images/custom_field.JPG

The plugin doesn't support this ability. If this field can be added somehow to HTML markup then the plugin can show it.

The custom field is outputted/included in the html via in this code:
contents of custom field

Can that be done? I would be so :woohoo: :kiss: :woohoo: if it could be.

Hello,

I was greatly pleased with the solution that you provided. :)

I had sent you an email, in regards to a modification, that I did not hear back from you on. Possibly it didn't not arrive/SPAM/all the other things that can go wrong. May I send another? I would gladly pay for the modification requested. Of course, that would depend upon your time/health/and all the other things in life, but I am more than willing to compensate you. :)

Best,
Will

Hello,

Could you re-send the link by email?

Regards,
ARI Soft
