Fancy Lightbox no longer working on new browsers Posted by kohnworkshop - 2022/03/10 16:28 Hi, I've used Fancy Lightbox for a few years without any issues, but a viewer recently told me that my site was not posting any images. I didn't know this as it's still posting them on my usual browser (chrome). Attached are a view of the page on my browser. In guest mode (both in chrome) it just has the text without images. Safari also shows no images. Since I'm a painter not having images is a major issue :S Help appreciated. _____ Re: Fancy Lightbox no longer working on new browsers Posted by kohnworkshop - 2022/03/10 16:30 The site/page in question is https://kohnworkshop.com/portfolio/ Re: Fancy Lightbox no longer working on new browsers Posted by kohnworkshop - 2022/03/10 16:51 Upon further investigation, it seems like the links and images are "there" but the thumbnails do not show. This is the screen shot of my browser window (did not upload earlier as it was too large) Re: Fancy Lightbox no longer working on new browsers Posted by kohnworkshop - 2022/03/10 16:54 image still needed to be smaller. I'll get there eventually :-) https://www.arisoft.com/images/fbfiles/images/Screen_Shot_2022_03_10_at_11.png Re: Fancy Lightbox no longer working on new browsers Posted by admin - 2022/03/12 11:54

The lightbox with image and title is opened when we click by a thumbnail on the page. It is not clear what's wrong. Could you illustrate on a screenshot what's wrong?
