Pre purchase questions

_____

Hi,

I would like to buy the developer version but I have some questions:

1. Will this plugin affect performance (i.e will it slow my site down)?
2. is there any way to open Microsoft Word or Excel documents with the plugin?
3. Once an image is opened, how can the user download it or print it? I see a download/print option for PDF but not for images.
4. Is there any way to get the stats (i.e. the number of views, downloads per file)?

Thanks in advance!
