
Including answer responses in email

Posted by rsonnenberg - 2022/09/26 14:51

I am using the personality questionnaire as a way of scoring certain answers, as a diagnostic. Is there any way of including the answers that were given in the email that is sent? It can include the user's score, but being able to include the responses they gave would also be very helpful.

Hello,

If you mean "ARI Stream Quiz", it doesn't support ability to send questions with answers by email.

Regards,
ARI Soft
