lightbox is not used everywhere
Posted by servb - 2023/01/25 10:58

_____

Hello

the lightbox is not used everywhere why is that?

here is a link where it works: https://bit.ly/3j13fK4

here one where the lightgallery doesn't work: https://bit.ly/3WAEQce

thanks in advance

_____

Hello,

Another lightbox is used on the second page.

Our lightbox can add navigation on this page if populate "Images -> Custom grouping selectors" parameter on "ARI Fancy Lightbox -> Settings -> Integration" page with the following value:

.gdlr-core-pbf-element$$A.gdlr-core-lightgallery

Regards,
ARI Soft

_____

Unfortunately we can't investigate it because another lightbox is used on the page.

Regards,
ARI Soft

_____

Yes, I can set a lightbox in the theme settings, but ARI Lightbox is not displayed there. Goodlayers->Goodlayers->Miscellanea->Plugins->Lightbox Typ Over there LightGallery, ilightbox, Strip. LightGallery is selected.

The theme is from Goodlayers, would you like to take a look with an account?
