
Captions on Lightbox

Posted by etiennedelcambre - 2023/04/05 09:46

Hello,
First, thank you very much for your great WP plugin.
I am using it combined with the Meow Gallery plugin and I have a little issue with the captions, which are not displayed.
Here is my page : <https://filmerletravail.org/retour-en-images-sur-la-14e-edition/>
The captions display in the gallery, but not in the lightbox. Could you tell me how captions are retrieved but the plugin and why they don't display in this case ?
Thanks in advance
Best regards
Etienne

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
$('.mgl-item').each(function() {  
  var $item = $(this), title = $item.find('.mgl-caption').text(), $a = $item.find('.mgl-img-container a');  
  
  $a.attr('data-caption', title);  
});
```

Regards,
ARI Soft

I am having the same problem as Etienne, except I am using the Gutenberg gallery.
The captions display in the gallery, and clicking any image brings up the lightbox and I can progress backwards and forwards in the lightbox, but the lightbox images don't have a caption.
Sample page:<https://lykewake.uk/wakes/march-2023/>

I have added the javascript as above in the hope that it might work, but it doesn't.

Best wishes
Roger

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
$('.wp-block-image .wp-element-caption').each(function() {  
  var $caption = $(this);  
  var $a = $caption.parent().find('a');  
  
  $a.attr('data-caption', $caption.html());  
});
```

Regards,
ARI Soft

Thank you, that now works with the captions being displayed below the image in the lightbox.

I am having the same problem; the lightbox images don't show their caption.
The photo gallery is generated by Advanced Custom Fields.
Sample page: <https://dongenwebdesign.nl/nam-liber-a-tempor-cum-soluta/>

Thanks, Peter

The generated HTML code for the gallery doesn't contain any captions for images so nothing is shown in the lightbox.

Sorry, you are right. I added ' . \$image . '
Hope this helps.

Thanks, Peter

Hi,do I have to add more code or information?
Please let me know.

Thanks, Peter

I switched to other software for this client. I did not have the time anymore to wait for your reply.
