
Not working on featured image in some theme

Posted by rggrgg - 2023/09/06 09:30

I am using a theme from ThemesDNA.com and they say that the lightbox uses a script which is not compatible with their scripts.

Can you have a look?

Hello,

Could you provide a link to a page where the problem occurs? Probably you have more technical details what's exactly is not compatible with theme scripts?

Regards,
ARI Soft

Could you specify what image on the page causes the problem?

Regards,
ARI Soft

<https://sistemabates.it/aiuto-professionale-inutile/>

If you clic on the yellow funny car in the featured image, the page is simply reloaded.

This happens with every featured image at the top of each post.

It is not clear what's wrong with it. The image is wrapped with anchor tag with link to current page:

So the theme should not put the image in a link to same page but what should I do to correct this?

Re:Not working on featured image in some theme

Posted by admin - 2023/09/06 12:39

Add the following code to "ARI Fancy Lightbox -> Settings -> Advanced -> Custom JS Code" parameter if you want to open the image into the lightbox when click instead of navigating via anchor link:

```
setTimeout(function() {
$('.entry-content>A:has(.wp-post-image)').each(function() {
  var $a = $(this);
  var $img = $a.find('img');

  $a.addClass('ari-fancybox');
  $a.attr('data-src', $img.attr('src'));
});
ARI_FANCYBOX_INSTANCE.convertElements();
}, 10);
```

It doesn't work, I have contacted the theme developer to ask if they can remove the a href around the featured image.

Re:Not working on featured image in some theme

The page doesn't contain the custom code.

Regards,
ARI Soft

I removed it because it did not work, opened the page again after some time delay but image remains there..
