White border around Fancy Lightbox image

Posted by vinner - 2024/02/26 19:09

_____

Hi,

This may not be down to Fancy Lightbox, but I can't find any CSS on the page that's causing it. There is a white border around an image only when you link it to a file (and it becomes a ari-fancybox). See screenshot. Upper image is not linked to anything. The lower image is linked to the media file. As soon as I do that, a white border appears, but I don't know how to get rid of it. See here for page test page

Any help would be appreciated.
Thanks

_____

Hello,

This style is added by theme:

 https://www.ari-soft.com/images/fbfiles/images/fancy.png

You can add the following CSS rule to remove white border (for example to "Custom CSS" parameter on "ARI Fancy Lightbox -> Settings -> Style" page):

.entry-content A.ari-fancybox,.entry-content A.ari-fancybox IMG {box-shadow: none;}

Regards,
ARI Soft

Hi,

Thanks for the very quick and detailed response. You have answered my question. This had really confused me because there was no border, margin or padding. Now I have learned that box-shadow can look like a border.

Thanks for your solution. It's really appreciated.

Cheers
