
Internal Link with transparent background

Posted by wearetak - 2024/08/09 20:14

Is it possible to open an internal link in the lightbox, but force the background to be transparent?

I've tried styling the body background of the source html to be transparent, but it always displays as a 100% opaque white background.

Thank you!
Alex

Hello,

Could you provide a link to a sample page? Theme styles can affect on background color.

Regards,
ARI Soft

Of course..

I was able to find a solve by forcing the div class fancybox-iframe to be transparent. Not sure if that's the proper way to do that but seems to work:

<https://wearetak.com/new-v1-popup-240811>

The hurdle I'd like to solve is to be able to click anywhere outside the video to close the page (as oppose to needing to click anywhere outside the Lightbox's boundary of the link's page).

Is there a solution for that?

Thank you!

Alex

As we see the lightbox is closed when click outside the video. Do you still need any help with it?

Regards,
ARI Soft

Thank you, I think I'm good for now. Will come back with any other questions.

Best,
Alex
