
Bigger Thumbnails (Solution)

Posted by Josh - 2024/08/19 22:55

Want bigger thumbnails? Apply the following CSS to the Style tab of Ari Fancy Lightbox settings:

```
.fancybox-thumbs {  
  width: 300px !important;  
}
```

```
.fancybox-show-thumbs .fancybox-inner {  
  right: 300px !important;  
}
```

```
.fancybox-thumbs__list a {  
  height: 150px !important;  
  width: 150px !important;  
}
```

/ Lets shrink the scroll bar for more room */*

```
.fancybox-thumbs__list {  
  scrollbar-width: thin;  
  scrollbar-color: #555 #333;  
}
```

Want even bigger thumbnails? Set the first two widths (300px) to the max container size, then divide your new value by 2 and apply it to .fancybox-thumbs__list a (currently 150px).
