After save in cf7

still we have message "Changes that you made may not be saved." http://www.ari-soft.com/images/fbfiles/images/cf7_connector.png

Hello,

Could you specify what WordPress and "Contact Form 7" versions are installed on your site? Do you use any other plugins for CF7?

Regards,
ARI Soft

Thank you. When I click "Save" button (checked in Google Chrome browser), form settings are saved and the warning message doesn't appear. Could you explain in more details how to reproduce the problem?

Regards,
ARI Soft

Update the plugin to v. 1.3.2. The warning will be shown only if propert(ies) are changed on core CF7 tabs.

Regards,
ARI Soft
