
Not sending emails to MailerLite

Posted by ckid0144 - 2017/12/26 20:05

I have CF7 Connector connected to a MailerLite account. I just set it up for a CF7 form on my website. The attached image shows the settings for the form. I went to my live site and filled the form out to test it. My email was not added to my group (the one that is selected in the settings on the image) in my MailerLite account. What am I missing?

Hello,

Open "General" tab on "CF7 Connector" page, enable "Debug log" and "Application log" parameters and try to subscribe. After this use "View log" links for "Debug log" and "Application log" parameters to check logs. It can be help to investigate the problem.

Regards,
ARI Soft
