
Zapier not working PRO Version

Posted by apage8 - 2017/12/31 02:30

See screenshot, the zapier webhook field is missing. I tried uninstalling and re-installing a few times and it didnt fix the issue. See image here: <https://www.dropbox.com/s/uxndhwcxwqwa97m/Capture.PNG?dl=0>

Hello,

This screenshot of "CF7 Connector" plugin settings page. "Zapier Webhook URL" parameter is located on "Zapier" tab directly on CF7 form edit page. Open the form which you want to integrate with Zapier and then open "Zapier" tab.

Documentation is available here.

Regards,
ARI Soft
