List of Groups from Mailerlite not Complete

Hi,

We run a multisite through WordPress with 23 sub-sites, we have newsletter signup forms, inquiry forms etc. Altogether we have more than 100 groups on Mailerlite to better manage our subscribers.

We just added a 101 group to Mailerlite but seems that the group selection option is only limited to the first 100, see screenshot https://prnt.sc/kbg2kc

How can we increase the number of available groups? Is it an issue with the Contact Form 7 Connector or a limitation set by Mailerlite API?

Hello,

Could you provide a temporary MailerLite API key by email so we can investigate the problem on our test server?

Regards,
ARI Soft

Hello,

Was this problem solved?

What is happening to me is that when I first installed the plugin, all groups were displayed.

However, if I now add some new groups in MailerLite, they don't appear on the WordPress backend - Cf7 section.

Ari Soft, can you please advise?

Thanks
Max

Hello, I wrote you by email but I never got any answer.

Do you have any news? I'm still not able to see al the lists and groups.

Thanks
Max
