
Purchased through ENVATO and no ZAPIER integration

Posted by Rey - 2019/06/06 18:20

We have just purchased your plugin from envato which I understand is the PRO version.
After installing and activation, no ZAPIER integration anywhere, neither on the plugin settings page (just a checkbox) nor on the form page.

Plugin settings page also asks for an API Key, Where is that api key?

We need Zapier integration asap.

Could you help us?

Thanks in advance.

Hello,

Integration is configured directly on form settings page. Go to "Contact -> Contact Forms" page (this is CF7 plugin) and select form which you want to integrate with Zapier. It will contain "Zapier" tab. Open it and follow the instructions on the page:

<http://www.ari-soft.com/images/fbfiles/images/zap-cc63aedc318183e47db89ba168afec99.jpg>

PS: Check your mail, we sent API key.

Regards,
ARI Soft

That was fantastic.

Incredible job with this plugin.

Thanks!
