## MailerLite API key: the request failed

Posted by allesoverwaterstof - 2019/12/03 11:04

---

Currently it is not longer possible on my site to subscribe to a MailerLite newsletter. It used to work just fine.

When checking, i noticed that I can not check the MailerLite API key. I get the error message: the request failed.

The API key is correct and valid. Both the Debug log and Application Log show no entries.

Hello,

Could you send the key by e-mail so we can investigate the problem?

Regards,  
ARI Soft

Hi,

I have sent you the key. The problem is still there.
