Zapier connector CF7
Posted by StevenVdh - 2020/01/28 11:16

_____

hi there, I'm trying to connect CF7 to Zapier with your pro plugin I specifically bought for this. I would need to send last name, first name, email and phone to zapier. In zapier, I can't find app "contact form 7 connector"...
Thanks in advance for support please!

_____

Hello,

The plugin integrates CF7 forms with Zapier via webhook. You can read here how to configure integration with Zapier.

Regards,
ARI Soft
