
how to connect contact form 7 with mailerlite

Posted by sjaskaran040 - 2023/02/10 07:59

hi, I was trying to connect contact form 7 with mailer lite. i don't know how to do it. i just installed the contact form 7 connector. I add my API key. i don't know what to do next. i just try to use my form but nothing happened. can you guys please help me connect contact form 7 with mailer lite.
thank you

Hello,

Open CF 7 form which you want to integrate with MailerLite. Form edit page will contain "MailerLite" tab. Navigate to this tab and configure integration parameter (select list(s), mapping of custom fields and etc.).

Open "CF7 Connector" settings page and make sure "MailerLite" checkbox is unchecked for "Disabled add-ons" option.

Make sure the checkbox is UNCHECKED. Other settings will be available on CF7 form edit page, not on "CF7 Connector" page because each integration for each form is configured separately (they can assign user to different lists, use different custom fields and etc.).

thanks, I guess it is working now. It is showing email addresses on my mailerlite subscribers tab but the emails are not getting assigned to the group I select. Here is my setting, let me know if I am doing something wrong.

Probably double opt-in option is enabled in MailerLite settings (check it on MailerLite side). In this case a user will be assigned to list(s) only if accept a confirmation email which is sent by MailerLite.

BTW, you can also enable "App log" and "Debug log" in "CF7 Connector" settings and check them after CF7 form submission.

Try to update the plugin to v. 1.2.0.
