
Form throws error on CF7 form submission

Posted by designbank - 2023/02/22 10:16

Upon form completion the information is sent to Mailer Lite and works fine but for some reason it throws a PHP error at the top of WordPress.

Error is below:

Warning: count(): Parameter must be an array or an object that implements Countable in

Hello,

Could you specify what PHP version is used on your site and if possible could you the whole warning message (with file name where it occurs)?

Regards,
ARI Soft

We are running PHP 7.4.33 and the full error is Warning: count(): Parameter must be an array or an object that implements Countable in /home/customer/www/bellaaccess.com/public_html/wp-content/plugins/contact-form-7-connector/cf7_addons/maillerlite/helpers/class-maillerlite.php on line 173
