## Conflict with CF7 Google Sheet Connector

Posted by digital - 2023/04/02 15:37

---

After updating Contact Form 7 Connector and CF7 Google Sheet Connector and CF 7 itself the form won't submit - it just has the spinning wheel going. The only way I can get it to work is by rolling back Contact Form 7 Connector to 1.1.14, CF 7 to 5.7.1 and CF7 Google Sheet Connector to 4.6. This isn't ideal obviously as we need to keep plugins updated. I don't know if the problem is with Contact form 7 connector or CF7 Google Sheet Connector so I am posting in both. Wordpress version is 6.2

Hello,

Could you specify how to reproduce the problem so we can try to reproduce it on our test server and investigate this? What plugins version should be installed. Does it depend on integration with specific service (MailerLite, MailChimp, Zapier)?

Regards,  
ARI Soft

Sorry for the delay. I thought it magically fixed itself but I'm still having a problem. Contact form 7 version 5.7.1. I just updated Contact Form 7 Connector to 1.2.1 and the form stopped working so I rolled back to 1.1.14.
