
CF7 Custom Fields DYNAMICALLY into Klaviyo

Posted by yourstyleedit - 2023/04/11 06:33

Hi there,

I am trying to get fields from a complex form created with Contact Form 7, into EITHER Klaviyo directly, or into Zapier and then through to Klaviyo.

Can you please advise if 'CUSTOM FIELDS' ie; fields that aren't your standard name / city / postcode etc, can be passed through DYNAMICALLY and if so, how we can do that?

Thank you!

Laura.

Hello,

It can be integrated with Klaviyo via Zapier (it supports by PRO version). Any form field can be send to Zapier and then to Klaviyo.

Regards,

ARI Soft
