
ARI ZOOM with K2 Images

Posted by totallnet - 2011/05/12 05:28

Is it possible to use with K2 images...

K2 resize all images uploaded to XS, S, M, L and XL sizes on media/k2/itens/cache with prefix code .. like this
01f1a05053c6242fcfa23075e5b963c1_L.jpg

Is it possible to include in k2 php code the ari zoom in plugin mode??

Now k2 open the image with modal but i need to zoom in the imagem...

Hello,

Sorry for delay. It is possible if replace K2 code with the next code:

```
{arizoom activeType="singleimage" src="" srcSmall=""}/{arizoom}
```

Regards,
ARI Soft

Hello, I've purchased ARI ZOOM as well since from this forum reply I anticipated I could get ARI ZOOM to work with K2 in Joomla 1.5.

Now ARI ZOOM is installed and activated, and I have the same code as described above in my .php-file with name: item.php (which is in the directory /components/com_k2/templates/default/)

In the 1st forum post the code provided was (I extended the piece with additional code to provide the full info):

Hello,

Is it possible to provide us link to a page where you want to use the extension and temporary access to your J! backend by email so we can help to modify necessary file(s)?

Regards,
ARI Soft

Hello!

Thank you for the quick response!
I'm sending you the requested info by email.

Fred.

Information has been sent, but I don't think you've been able to look at this already.
When do you expect to be able to do this?

Thanks.

Thanks again - will you notify me when this becomes available?
And will it come with documentation on how to implement/use in combination with K2?

Fred.

Yep, checked - corrected wrong info and replied.
You should have the correct info now.

Re:ARI ZOOM with K2 Images

It is now working! Great!
Thanks for your support - and all of that within 24 hours after purchase!

ARI Zoom now works just fine and smooth with the K2 images and is simple to configure/use.

Thanks again and keep up the good work and services.

I am trying to also use ARI Zoom with K2 images.

that do i need to add to K2 item.php file to use the zoom feature?

item.php attached to message.

Thank you <http://www.ari-soft.com/images/fbfiles/files/item.txt>

Re:ARI ZOOM with K2 Images

Do you enter a code with images on backend or what images do you want to use with "ARI Zoom"? Could you explain it in more details?

Regards,
ARI Soft

Re:ARI ZOOM with K2 Images

Posted by mattmau - 2012/05/23 15:56

I would like to implement the zoom on the following page:

<http://coollux.undefeatedinteractive.com/v1/index.php/2012-05-08-23-27-28/item/11-mitchell--ness-chicago-blackhawks-snakeskin-strapback>

I would like it to zoom on the main image.

I was reading the first posts in this thread, and was trying to start there, but was unsuccessful.

Hi,
I need to associate the ARI Zoom with the catalog that I am setting with K2.
It have given an error: {\$emptyText}

I need that the products items have the zoom.
Can you explain to me where I have to configure it? Or I have to send an email for you with the joomla's administrator access?

See the attach with a print screen, please.

Thank you in advance,
Claudia

Hello,

Could you send a link to a page by email where you want to use zoom effect?

PS: If you send also a temporary access to your J! backend by email, we will configure the extension.

Regards,
ARI Soft
