Ari Zoom

Posted by johnlittleatom - 2011/06/17 19:48

_____

I have just installed plugin and module in a Joomla 1.5 site that is in development. I need the zoom to work in two menu items, one on the left in menu item 1 and one to be below in menu item 2 is this possible.(see www.dragonarchery.co.uk)High Scores and Dragonslayers

_____

Hello,

If you want to attach zoom effect to a single image, you can use "System - ARI Zoom Anywhere" plugin. The code looks like:

{arizoom activeType="singleimage" src="PATH_TO_IMAGE" thumbWidth="200"}{/arizoon}

Where PATH_TO_IMAGE is path to image.

PS: If you want to use the plugin not in Joomla! articles, set "Mode" parameter in plugin settings to "Anywhere".

Regards,
ARI Soft

Many thanks for your response. Now have second problem, On page load the images Stack instead of displaying vertically, if you refresh they appear properly.
The large Image moves slightly when the zoom is activated.
Code I am using:-

{arizoom thumbwidth="200" activeType="singleimage" src="images/stories/image.jpg"}{/arizoom}

If you want to look www.bs-l.co.uk/demo9

Dragonslayers and high scores(castlewall & Agincourt)

Any help appreciated

John :(

Hi,

Have downloaded the modaule at the same time as the plug-in. But the problem of stacking still there.

Please see website above.

Thanks
John :blink:

On your site "ARI Zoom" v. 2.2.0 is installed, but the latest version is 2.2.1. We released it after your previous post. Download extension's package from our site again please and upgrade "ARI Zoom" module. After this clean browser's cache. It should help.

Regards,
ARI Soft
