Thank you, great. One thing, it is possible to make one picture in "ari zoom" and by click a gallery (more than one picture) in "ari pretty photo".

Hi all .  
I don't know is it the right place to post this question , if I wrong I'm sorry .  
I just have one quick question about your zoom product .  
Is it possible to add function to this extension , that will let our users to zoom+in or zoom+out post content (change font-size) ?

Hello,

The extension doesn't support "zoom" effect for text. It works only with images.
