
Ari zoom anywhere

Posted by Schubi - 2013/02/01 07:59

Dear Admin,

could you explain,how to use Ari zoom anywhere Plugin. I want to show the zoom effect on all single images in Joomla articles. I put in {arizoom moduleId=""}/{arizoom} on top of the article editor. The Ari zoom id is 98, but it doesnt work. The domain is www.holzbrand-keramik-schubert.de, if it helps.
Must I put some image path into the modul, or works it from itself?

I look forward for some support.

Schubi

Hello,

Download and upgrade "ARI Zoom" module and "ARI Zoom Anywhere" plugin. New version of the extension supports ability to use the plugin for inline images in the following way:

```
{arizoom activeType="inlineimg" thumbWidth="150"}  
.. content with images goes here ...  
{/arizoom}
```

If you want to add zoom effect for all images in an article, place article content between {arizoom} and {/arizoom} tags.

Regards,
ARI Soft

Solution given here contradicts what is in the current Ari Zoom online user manual link (NOTE the placement for the manual link is confusing as it first appears to be directions for using Flickr)

How to load 'ARI Zoom' module into article?

Type the following code in article for loading 'ARI Zoom' module:

```
{arizoom moduleId=""}/{arizoom}
```

Where is 'ARI Zoom' module id. You can find module id if open 'Extensions->Module Manager' page in modules grid in ID column or on module settings page in ID field.

I tried the inline solution given on this thread and it does not work on my Joomla 3.0 install. Screenshot attached.

Anywhere Plug in settings are:

MODE: content
Include jQuery: yes
jQuery noConflice: yes
...
Link Target: self window
Lightbox integration: none

Choose type: inlineimages
Thumbnail count: 2

Please advise.

Hello,

Could you send screenshot of plugin settings page by email and provide a link to a page where the problem occurs so we can investigate it?

Regards,
ARI Soft

Yeah! Ari-Soft support jumped right on the problem and got it fixed. Appeared to be something to do with the Gavick cache and also using the MODE set to CONTENT. Back at my desk now. All good. Thanks guys.
