
Show Captions when integrated with ARI Colorbox

Posted by Albano - 2013/02/23 20:38

Hello, I am using ARI ZOOM integrated with ARI Colorbox, I want to show captions column form .csv file in the colorbox, but not the title, how can I achieve this?

Hello,

"ARI Zoom" v. 2.3.3 supports ability to specify what parameter from a CSV file to use for captions under thumbnails. Use "Image gallery -> Layout type -> Simple gallery -> Title param name" parameter for this purpose.

PS: The latest version of the extension is available in "Member Area".

Regards,
ARI Soft

Thanks for the quick response, but I do NOT want to show captions under thumbnails, I want to show specific parameters of csv file in the ARI COLORBOX window when thumbnail is clicked. I add: when ari zoom and ari colorbox are integrated. :) I would appreciate any help

It is not possible to define another column for title in colorbox when it is integrated with "ARI Zoom" extension, but it is possible to use titles for "ARI Zoom" in "Caption" field in CSV file and set another column (instead of "Title") for captions under thumbnails.

Thank you very much, I just did what you say in a test site, and it worked fine, but... how can I upgrade the module in the real site, without destroying all the galleries already created?

Install new version of the module through standard Joomla! installation page. Installer upgrades all necessary files.
