Hello Support Team

I have a little problem with my ari zoom which I have bought from your homepage.

I want to have on some pages the zoom module to show a seperat window with the picture.

but with your description (handbook) I have problems.

when I write {arizoom moduleId="96"}{/arizoom} I get the following picture:

Picture 1

If I am writing the following " {arizoom 96="96"}{/arizoom} it gives no error

but there is no function on the page.

I have also changed the values you have written in the data Ari Zoom anywhere Plugin,

and in Ari Zoom Module.

I hope you can help me with my problem.

kind regards

Hello,

Could you send screenshot(s) of module settings page by email?

Regards,

ARI Soft
