
Zoom showing the entire image?

Posted by jamesweb - 2014/12/09 15:24

Hi support,

I would like to know if it is possible to zoom the picture using the plugin showing the entire image?

Regards,

James

Hello,

The extension can create thumbnails automatically. For example use the following plugin code:

```
{arizoom activeType="singleimage" src="PATH_TO_IMAGE" thumbWidth="100"}{/arizoom}
```

Regards,
ARI Soft

I want to decrease the zoom lens of the image so that it will fit on the thumbWidth. Can this be done?

Could you send an image where we can see what do you want to achieve?

Attache is the screenshot.

I want to make the zoom view 50% of height and 50% with while maintaining the full image view. <http://www.ari-soft.com/images/fbfiles/images/zoom-a9ee2240cd9673c188267fc6cc2d7427.jpg>

Sorry, but currently it is not possible. We are working on a new version of the extension which will be responsive.

Regards,
ARI Soft

Thank you so much for the honest reply. Can you tell me what variable I will alter to change the zoom level of the big image? or I need to resample to a specific with and display as big image?

Please advice.

I found the solution using transform. Below is my css code 40% reduce from normal big picture:

```
.cloud-zoom-big {  
width:100%;  
height:100%;  
-webkit-transform:scale(0.4);  
-moz-transform:scale(0.4);  
-ms-transform:scale(0.4);  
-o-transform:scale(0.4);  
transform:scale(0.4)!important;  
}
```
