
new problem with zoom

Posted by pixelschupser - 2014/12/29 13:43

Hello Ari Support

I have written down the next problem with my arizoom.

On my homepage at home where i test the original homepage all is running on a really famous status. But I have problems on my real onside homepage with the arizoom function. All values are the same in my private side and the online side. I have checked it moretimes today. On the private side it shows a little window which will show the growing windows. On my onside homepage it shows only a bigger hand hich will means klick on this page and show more details. But the details are if I cklick with my mouse it goes back to my homeside where I am standing before I click some pages to look for it.

I hope you can help me with my problem.

I will open the system for you if you must have an account. But I want tell you the username and passwort on private Email.

The only thing which I think is that the online side is only via https is connectable.

kind regards

Hansjörg Lauble <http://www.ari-soft.com/images/fbfiles/images/bildschirmfoto.jpg>

Hello,

Could you send a link to a page where we can see the problem by email?

Regards,
ARI Soft
