
not working

Posted by johnnysassoli - 2011/12/26 18:56

Hi

I bought your product but hard to me to get it working

i think nothing too hard to set, i have an images directory that i put in the directory list, but seem not working

the site is <http://www.diskaos.com>

the directory is the one containing all the images of the music records in my database.

they are shown in the proper release module , in search results and in the recently added releases module (the one to the left at the bottom),but I need Magnifier ONLY working in the proper release module.

http://www.diskaos.com/index.php?option=com_muscol&view=album&id=444597&Itemid=49

please help me, all the best

Hello,

Sorry, but could you specify what code do you use and what exactly doesn't work?

Regards,
ARI Soft

what code?

i simply install the module and type the pics database from which the module has to keep images.

what else is to do?

please i fuou can take a look and work for me from backend

Sorry, but it is not clear what you did. Do you mean "ARI Smart Content" module? What is "pics database"? If you mean "ARI Magnifier" plugin from "ARI Smart Content" extension, it requires to place plugin code on a page to show images with magnifier effect. Demo and documentation can be found [here](#).

sorry, with database i meant ... pics contained in the image folder has to be magnified (and only in one page of my site)

please help me

site

<http://www.diskaos.com>

For example if you want to show images with magnifier effect from /photos/album1 folder, place the next code in an article or other content:

```
{arimagnify srcDir="photos/album1" includeSubDirs="true" thumbWidth="150"}{/arimagnify}
```

Regards,
ARI Soft
