
ARI Magnifier - Need help setting up

Posted by kapsig431 - 2009/10/22 01:44

I'm very new to Joomla, but have taken a relative lengthy course on Lynda.com to get oriented. I have taken a job helping a company update their Joomla 1.0 site. It has many pictures and I'm trying to find out how to implement this new mambot. I have installed it properly and put in my license key. However, I can't find where to adjust the parameters. I went to the mambot manager, but the parameters for setting the path to the directory of files doesn't appear. So, my question is, where do I type in the parameters to make this thing work? I'd like to point it to a directory using the srcDir parameter. Can someone please tell me where to input the following information? I would really love some step-by-step instructions.

ARI Magnifier plugin (mambot) parameters/example:

```
{arimagnify src="/big_img" srcSmall="small_img" srcDir="src_dir" includeSubDirs="true|false" thumbWidth="width" thumbHeight="height"}
```

Thank you,

Patrick

Hello,

Place the following code to your article, please:

```
{arimagnify srcDir="/images/my_dir" includeSubDirs="true" thumbWidth="200" thumbHeight="300"}
```

Only specify necessary directory for 'srcDir' parameter. If you have any problems, you can provide temporary access to your Joomla! backend by email (info@ari-soft.com) and we'll help you resolve this issue.

Regards,
ARI Soft
